## Objective

Seeking a **Computer Science co-op for Spring-Summer 2027** to apply and learn software development skills

## Education

**Computer Science** - Bachelor and Master of Science  
Rochester Institute of Technology

**GPA:** 3.4/4.0 - *Dean's List*  
Expected May 2028

## Experience

**Junior Data Security Engineer** - Blue Cycle LLC

January 2026 - August 2026

- Built and tested **PowerShell automation scripts** with a team of engineers and AI tooling to assess Microsoft 365 tenant configurations against a AI-readiness security framework.
- Analyzed **access policy configurations** (Conditional Access, RBAC) to reinforce least-privilege principles across client tenants.
- Built a **Foundry-based AI chatbot** with an internal system enforcing least-privilege access for AI-assisted IT operations.
- Earned **Microsoft 365**, **Cribl**, and **Claude** certifications, covering endpoint management, data pipelining, and prompt optimization.

**Teaching Assistant - Software Development** - Rochester Institute of Technology

August 2025 - Present

- Assist in instruction for beginner-level software development courses covering **Python and Java**.
- Mentored students to help them understand processes of software engineering, developing skills such as Python and Java logic, syntax, **unit testing**, debugging, and the **git workflow**.
- Grade assignments and provide feedback on projects to help students improve code quality and software development skills.

**Technician and CSR** - RIT Information Technology Services

August 2025 - Present

- Identify hardware issues for **4000+ supported Dell and Mac devices** using vendor parts and guides.
- Diagnose and repair students' personal devices, including part sourcing for damaged hardware and servicing impacted devices.
- Adhere to a strict **ServiceNow workflow** for efficient communication with team members.

## Projects

**Carrier Pigeon** - C, Vim, Linux, Git

📄 shaeespring/CarrierPigeon

- Developed a **POSIX-compliant** CLI task manager in C with a **plain-text database, modular command parsing**.
- Built an **HTTP/1.0 web server** from scratch using POSIX sockets, exposing **REST-style endpoints** that serve HTML and JSON.
- Designed and implemented a **TUI editor** on top of the file-based model for batch creation, editing, and deletion of tasks.

**Computer Science House** - Go, Python, Git, LaTeX

📄 ComputerScienceHouse

- Contributed to **feature development, issue tracking**, and ongoing **maintenance across 50+ services**.
- Redesigned **governance procedures** to streamline Executive Board elections and member evaluation processes.
- **Reviewed pull requests** and **provided technical mentorship** to new contributors across shared services.

## Extracurriculars

**Computer Science House - Executive Board Member and Secretary**

- Coordinated meetings for periodic deep cleans and projects, managing volunteer teams and working with other members to maintain and improve shared residential facilities.
- Prepared for renovations to our dorm hall, focusing on clear communication between our organization and contracting decisions to ensure a smooth transition.
- Advocated for member needs in executive meetings, making decisions for community development and sustainability.
- Organized and published notes for executive board meetings and member meetings.

**Caring Hearts for Cats - Member and Volunteer**

- Coordinated daily feeding for a community cat colony, ensuring food and water at multiple outdoor shelters.
- Maintained the cleanliness and hygiene of handmade shelters to promote the health and safety of the feral feline population.
- Monitored colony well-being, reporting injuries, illnesses, or new sightings to senior members for intervention.

## Skills

**Languages:** Python, C, Java, HTML, Rust, PowerShell

**Technologies:** Git, Linux, Bash shell, Spring Boot, Microsoft Intune, MDT, Microsoft Foundry

**Tools:** ServiceNow, Avid Pro Tools, MiniTab, Canva, Multi-Vendor Hardware Knowledge, M365
